

# ICS2 – Programming Assignment 0

Topics: Home System Setup and Test Submission

## Marking:

There will be no mark awarded for this task, it is simply to ensure you are set up to eliminate future delays in the course.

## Task 1: File Setup

1. On your USB create the following folder setup, where indented folders are inside the previous folder

### For Grade 10's (ICS2)

- ICS2
  - NonProgramming
    - ComputerSystems
    - TechImpact
    - Careers
  - **Programming** ← This is to be set as your Workspace in Task 2 (Setting up Eclipse)

## Task 2: Install Eclipse Kepler at home (Should be done already)

1. Go to the **quest AA4** and locate the **Setting Up Eclipse at Home** section
2. Follow all of the **AA4** lesson content to setup your home computer for programming in Java

## Task 3: Create an Empty Project & Submit it

1. Follow the Create a Project steps found in lesson **AA5 – Intro to Eclipse** PowerPoint to create a new project
  - a. The project's name should be **PASS0**, (PASS0 stands for Programming Assignment 0)
2. Add the new Main class
3. Save your project using the **Save-All** button or **Ctrl-Shift-S**
4. Follow the Submissions steps in the **AA5 – Intro to Eclipse** lesson where the **PASS0** folder is the folder to be zipped and submitted on the course website
