

# Error Analysis Practice Work

1. Download the project named **BrokenCode** from the website into your Workspace folder
2. Open Eclipse and Import it into the Package Explorer by:  
**Right-Click Package Explorer→Import→General→Existing Project→Next→Browse to and Select BrokenCode folder→Finish**
3. Your job is to analyze the code and comments in the program to bring it fully functional. There are many bugs in all categories of errors
4. Use the following input sequence to test your program: 1,1,1,2,1,1,1,2,2,2
5. Expand your Console so it shows 3 full inputs and results and if you were correct it should look identical to the screen shot below
6. This includes spacing and results

```
Console [x]
Main (7) [Java Application] C:\Program Files\Java\jdk1.8.0_102\bin\javaw.exe (Oct 23, 2016, 10:27:01 PM)
2
You are currently facing North
After 8 moves.

Which direction would you like to turn? (Type a number)
1. Right
2. Left

2
You are currently facing West
After 9 moves.

Which direction would you like to turn? (Type a number)
1. Right
2. Left

2
You are currently facing South
After 10 moves.

Which direction would you like to turn? (Type a number)
1. Right
2. Left
```
